Author Index

Aubeck, R., 131

Bellhouse, B.J., 121
Bigelow, S.L., 57
Böddeker, K.W., 65

Chan, K., 183
Chen, J.-L., 87
Chilcott, T.C., 77
Christian, S.D., 193
Coster, H.G.L., 77
Cot, L., 99

Darcovich, K., 139
Diels, L., 249
Doleček, P., 111
Donnan, F.G., 45
Doyen, W., 249
Dutrochet, R.J.H., 5

Eppelsheim, C., 131

Fick, A., 33
Field, R.W., 259
Fouda, A.E., 183

Gekas, V., 155
Gemberling, A., 57
George, E.P., 77
Glad, B., 171
Graham, T., 9, 17, 27
Guizard, C., 99
Guo, Q., 273
Gupta, B.B., 259

Hampp, N., 131
Hörstedt, P., 171
Howell, J.A., 259

Irgum, K., 171

Jiang, J.-D., 163
Jicai, H., 217
Juang, R.-S., 163

Knudsen, M., 23
Kober, P.A., 61
Korotchkova, S.A., 273

Lacan, P., 99
Lee, W.H., 69
Lee, Y., 69

journal of MEMBRANE SCIENCE

Subject Index

Amino acids, 209
Anion exchange membranes, 229
Anionic polyelectrolytes, 229

Benzo-15-crown-5, 99
Biodegradation, 249
Biosensor, 131
Bipolar and biological membranes, 77
Blended membrane, 217

Calcium, 193
Cellulose triacetate, 217
Change in membrane properties, 229
Charge-mosaic membranes, 209
Cobalt ions, 69
Compaction, 155
Composite membrane, 249
Conducting polymer membranes, 239
Critical flux, 259

D2EHPA, 163
Desalination, 209
DFCM, 77
Dodecane–water emulsion, 259

Economic analysis, 193
Electrode, 131
Electrodialysis, 209
Enzyme extraction, 87

Facilitated transport, 99
Fixed charge, 77
Fixed-site carrier membrane, 99
Flux enhancement, 121
Fouling, 259

Hardness, 193
High cyanoethylated cellulose, 217
Hollow-fibre membranes, 183

Immobilization, 249
Impedance, 77
Interaction, 229
Interpenetrating polymer networks, 171

Ion transport, 99

Laminar flow, 121
Liquid membranes, 69
Liquid surfactant membrane, 163

Mathematical modelling., 111
Membrane, 171
Membrane bioreactor, 249
Membrane filtration, 259
Metal bioprecipitation, 249
Microbial degradation, 217
Microfiltration, 121
Modules, 139
Multichannel ceramic membrane, 111

Nickel ion, 163
Numerical simulation, 139

Penicillinase, 131
Performance, 183
Permeate flow, 111
Permeation, 69
Pervaporation, 273
Photopolymerization, 171
Polyacrylic acid, 273
Polyelectrolyte, 193
Polysulfone, 273
Pressure effects, 155
Pulsed-field gradient nuclear magnetic resonance, 273

Reversed micelle, 87

Scanning electron microscopy, 171
Selective transport, 99
Self-diffusion, 273
Simulated electroplating rinse solution, 163
Small charged organic molecules, 239
Softening, 193
Solvent extraction, 163
Spinning conditions, 183
Supported liquid membrane, 87
Surface treatment, 183

Thick-film, 131
